1 Introduction

The use of analytics continues to evolve: Most decision makers have bought into analytics at a strategic level and recognize that effective analytics could benefit their organizations, particularly in deploying cutting-edge technologies like AI and IoT. However, the number of those effectively using analytics strategically across the organization could be higher.

1.1 communication

Implementing an analytics platform has shown great promise in growing the strategic value of analytics and in fostering innovation. These are just two findings from new research from SAS*, consisting of in-depth interviews with professionals in 132 organizations and a global online survey. Based on the results of this research the e-book delves into the biggest opportunities and remaining challenges.

2 Scoring Criterion

Read this e-book to find out How organizations are preparing for the future with the strategic and innovative use of analytics.

2.1 reflection

SAS is the leader in analytics. Through innovative software and services, SAS empowers and inspires customers around the world to transform data into intelligence. SAS gives you THE POWER TO KNOW.

3 Conclusion

What challenges organizations recognize on their way to fully deploy the potential of analytics. How leading organizations benefit from an analytics platform and get out the most of their analytics investment.
